

Job Description: July 2021

Field Technicians and Field Assistants

Dias Geophysical is looking for individuals with a passion for the outdoors and those who thrive in harsh mountain environments.

You will be part of a diverse team of technicians, geophysicists and outdoor enthusiasts conducting state-of-the-art geophysical surveys in remote locations in all geographic regions and weather conditions, for up to 1 month at a time. Your responsibilities will include embracing our progressive HSE practices and procedures and continue with carrying out a variety of duties related to our field activities- this work entails digging, lifting, carrying, hiking, driving and other physically demanding activities.

Prior geophysics/geoscience experience an asset but most importantly we are looking for people who work well in a team, love the outdoors and have experience in mountainous terrain, and have a strong adherence to safety.

Prerequisites:

-physically able to hike up to 10 hours per day through rugged terrain with a backpack weighing up to 40lb.

-Experience working or recreating safely off-trail in mountain environments.

-Good sense of direction and bush navigation skills- prior experience with map, GPS and compass an asset.

-able to communicate effectively in English, in person, over email, and in the field using a handheld radio.

-strong safety record and adherence to HSE systems.

-Experience working around helicopters an asset.

-willingness to travel both domestically and internationally. Preferably possesses a valid Canadian passport. Other language skills (particularly Spanish) an asset.

-Ability to solve problems in the field with the tools and materials at hand. Ideal candidate would have some mechanical and electrical repair experience.

Job Type: Contract, full time.

Location: Global with a concentration in Western Canada. Applicants from BC, Alberta and Saskatchewan preferred.
